Define Your Home With Beautiful Color!

The Smart Choice For Building Beautiful Homes

LP® SmartSide® siding products are made from engineered wood for exceptional durability and beauty. They are strong yet light weight and come in 16' lengths to help speed up installation and reduce the number of seams on your home by up to 33%. Much like natural wood, LP SmartSide products help you add craftsmanship and warm appeal to any style of home.

Building Curb Appeal

LP SmartSide Trim and LP SmartSide Lap Siding help give any home the warm, natural look of real cedar without many of the worries. It's an outstanding upgrade from vinyl siding and fiber cement and also complements homes partially finished in brick, stone or stucco.

Built To Stand Up To Nature

Every LP SmartSide product is manufactured with our proprietary SmartGuard® process to resist fungal decay and termites

A Warranty That Protects Your Reputation

- Backed by an industry-leading, transferable warranty on the siding substrate*
- 5-Year 100% Labor and Replacement on LP SmartSide Trim and Siding
- 50-Year Prorated Limited Warranty on LP SmartSide Trim and Siding substrate

For more information on durable, beautiful LP SmartSide Trim and LP SmartSide Lap Siding, visit lpcorp.com/smartside or call 888.820.0325.

*See lpcorp.com for complete warranty details.

Touch up paint info

Touching up your current project is a simple yet important task. We know you want your project to be perfectly complete, so we recommend using a ColorStrand touch-up kit for exact color matching. These kits ensure you have the proper paint and applicators to do the job. Our proprietary ColorStrand color finishing process uses specially blended pigments to create a durable finish with long-lasting performance. These kits contain the same blended formula used on our prefinished LP siding and will provide the best performance.

Touch-up Tips

- Make certain the touch-up paint is color matched with your siding or trim. Find an inconspicuous area and dab a test spot to make sure the colors are a match.
- Touch-up paint should be used sparingly and should not be used on areas larger than 1" x 1".
- Applying touch-up paint to the nail heads should be done with a Q-tip or a pen applicator.
- Caulk should not be used to touch up nail holes, divots, cracks, chips or surface blemishes.
